PROFESSIONAL SUMMARY

Software and Data Engineer focused on building data-driven systems by combining software development, data engineering, and business process optimization. Experienced in designing solutions that structure, transform, and leverage data to support operational decision-making and scalable architectures. Proven expertise in Data Pipelines, Business Intelligence, Data Warehousing, and supporting large-scale enterprise ERP migrations (SAP S/4HANA). Aiming to improve data flows, system efficiency, and integrated digital ecosystems.

SKILLS & TECHNOLOGIES

Programming & Frameworks: Python, SQL, C#, .NET (WinForms, MVC), Flutter, Flutter Web, REST APIs

Data & Cloud: ETL Pipelines, Power BI, DAX, Power Query, Google Cloud Platform (GCP), Apache Spark, Airflow

Databases: Relational Databases (SQL), SQL Server, NoSQL Databases (Firestore / Realtime DB / Firebase), Data Warehousing

Methodologies & Concepts: System Integration, Data Modeling, Process Optimization, Business Intelligence, RBAC, Workflow Automation, Software Design, Agile Collaboration

PROFESSIONAL EXPERIENCE

Entreprise Nationale de Canalisations (ENAC SPA) | Algiers, Algeria

Software Engineer | Aug 2024 — Present

- Develop and maintain enterprise web applications that support operational and administrative processes.
- Design and optimize SQL databases, ensuring data integrity, performance, and reliability across core applications.
- Build dashboards, reports, and KPIs using Power BI to provide actionable insights for operational decision-making.
- Develop RESTful APIs and integrate internal systems to improve data exchange and automate workflow operations.
- Participate in the SAP S/4HANA digital transformation by supporting data preparation, business process analysis, and system integration.
- Collaborate with cross-functional teams (finance, procurement, HR, operations) to deliver technical solutions aligned with business needs.

Barbaros Events | Istanbul, Turkey

Assistant Manager & Event Planner | Jul 2022 — Nov 2024

- Supported planning, timeline creation, and resource allocation for corporate and international events.

- Coordinated logistics, vendors, and on-site operations with a cross-functional team of 10+ people.
- Delivered high-quality client experiences by applying strong communication and problem-solving skills in a fast-paced environment.

SELECTED PROJECTS

Performance Bond Digitalization & BI Analytics Dashboard

.NET WinForms, C#, Power BI, SQL, DAX

- Developed an internal desktop application automating tracking and approval workflows at ENAC, reducing document processing time from 15 days to 4 days.
- Designed an interactive Power BI dashboard to monitor activity, workflow efficiency, processing time, and validation rates using anonymized operational data.

Enterprise EDMS (GED)

Data Modeling, Security Access, Document Management

- Collaborated in a team to model and design a centralized Electronic Document Management System across organizational structures.
- Implemented role-based permissions, version controls, and paperless workflows to improve information retrieval efficiency.

Cost Estimation Web Application

Web Development, Calculation Engine, Excel Integration

- Designed a tool for estimating project requirements (workforce, equipment, consumables) based on custom zones.
- Integrated a robust calculation engine with automated Excel export generation to streamline budgeting and resource allocation.

AMISTA & ROKN Platforms (Freelance)

Flutter, Firebase Auth/Firestore, PDF/Excel Gen

- AMISTA: Built a vehicle rental system automating contract tracking, fleet availability, and reporting, cutting contract creation time from 45 min to 5 min.
- ROKN: Developed a secure ecosystem for neighborhood associations with role-based access control and GDPR-aligned residence anonymity, reducing administrative overhead by 70%.

MIZA Com Multi-Service Delivery Platform (Startup)

GCP, Backend Architecture, Scalability

- Co-founded and designed the backend architecture for a delivery application serving 15,000+ users.
- Scaled on Google Cloud Platform prioritizing high availability, optimizing core order management workflows.

EDUCATION & CERTIFICATIONS

Data Engineering Certification | Apr 2026 — Present

Future Skills Academy

- Focusing on Python, SQL, ETL pipelines, distributed systems (Apache Spark, Airflow), and data warehousing.

Business Intelligence (Power BI) Certification | Dec 2025 — May 2026

IT Comp

- Training in data modeling, dashboard creation, raw data transformation, and interactive reporting.

SAP S/4HANA ABAP Training | Nov 2025

Sonatrach Management Academy

Master's Degree: Computer Systems Networking & Distributed Systems | Sep 2019 — Jul 2021

Université Amar Telidji de Laghouat

Bachelor Degree: Computer Science | Sep 2016 — Jul 2019

Université Amar Telidji de Laghouat
